The classic social history of the Great English Agricultural Uprising of 1839 by two of the greatest historians of our age. In our increasingly mechanized age, the Swing revolts are a timely record of the relationship between technological advance, labour and poverty. With the onset of the Industrial Revolution, capitalism swept from the cities into the countryside, and tensions mounted between agricultural workers and employers. From 1830 on, a series of revolts, known as the 'Swing' shook England to its core. Landowners wanting to make their land more profitable started to use machinery to harvest crops, causing widespread misery among rural communities. Captain Swing reveals the background to that upheaval, from its rise to its fall, and shines a light on the people who tried to change the world and save their livelihoods. In reading this book, your view of a backward, conservative Long Island will be challenged. Long Island NY is America's first suburb. The book chronicles key highlights of the seventy-year time period 1945-2014 and describes the personal and organizational struggles and accomplishments of Long Island social work pioneers and civil rights, environmental, disabilities, and mental health leaders during an exciting and challenging time in Nassau and Suffolk Counties' history. The book features 630+ pages filled with inspirational stories, milestone events and lessons learned by professionals and lay people. There are over 500 names of organizations and people; 75 photos of lay and professional leaders; 100 Newsday headline stories concerning social issues; and 40 illustrations of "trail-blazing" projects in which Long Island launched "firsts" in the state and/or nation. From the Foreword by Ruth A. Brandwein, Ph.D., MSW, Professor Emerita and former Dean, School of Social Welfare at Stony Brook University and former Commissioner, Suffolk County Department of Social Services: "I wish I had had a book like this one when I entered the fray. It is a great Who's Who on Long Island, a primer of the cast of characters who have struggled for social justice over decades and also provides a chronological catalogue of the many social service agencies that developed on Long Island. To attempt to capture in one book the complexity of this sprawling place known as Long Island, and to do it through so many years is a major accomplishment. Arfin has done a prodigious job in compiling an enormous array of information about people, programs and policies over more than half a century, a time of great changes and upheavals. By framing the chapters in a national context, we are helped to understand what was happening on Long Island within the political and economic currents of national social movements that were occurring at the time. This book will be a valuable guide to those new to Long Island; it will be an excellent text for social work, human service, public administration, political science and history students. Most of all, it will be an invaluable reminder to those of us who lived through some or all of the struggles described. We will meet or reconnect with old friends and colleagues, we will understand better what motivated people to do what they did. For me, learning the "back stories" of so many of my colleagues who had worked and struggled in Long Island well before I arrived on the scene is invaluable,-- I just wish I had this book when I arrived. It could have saved me from making many mistakes and would have helped me be more effective in my efforts." Spanish philosopher, essayist, novelist and poet George Santayana said that "those who cannot remember the past are condemned to repeat it." History never quite repeats in the same way, but that understanding can help us learn from the past to work for a better future.

Domestic burglary has fallen significantly over the past 20 years in many countries, but still remains a high volume crime. On top of substantial financial loss and property damage, burglary also leads to high levels of anxiety and fear of crime. The research presented in this book represents the first systematic study of what actually works in security interventions against burglary, with cross-sectional data on different regions and socio-economic population groups. This work provides an overview of the scope of the problem and what can be done about it, drawing on extensive research evidence from projects funded by the Economic and Social Research Council (ESRC) Secondary Data Analysis Initiative (SDAI), and other sources. It reports detailed findings about which interventions are most effective for different population groups and how these measures can be implemented. It includes burglary prevention advice for homeowners, law enforcement and other public agencies, and makes recommendations for future research. In addition to being relevant to concerned citizens, police, policy-makers and crime prevention practitioners, this book will also be of interest to researchers in criminology and criminal justice, particularly those working on security and crime prevention, as well as urban planning and public policy.

This is the history of Donald Keene's family down through the ages. It is a varied and fascinating history. This Keene lineage can trace its ancestry through at least two lines that came to this continent on the Mayflower. Some were very involved in the Revolution, and the Civil War, as well as served honorably in World War II, and Don served during the VietNam conflict. I have spent several years researching this line, and it is the stories and origins that make it so interesting. As in all family histories, it is not just the names and dates that make up who we are, but where we have been and where we came from.

Subversive Champagne re-examines the 1960s cult television series, *The Avengers*, through a close analysis of 25 filmed episodes. The book examines how *The Avengers* - during the classic Emma Peel era (1964-1967) - was continually shifting the boundaries of audience expectation, defying both genre classification and viewers' traditional desire for kitchen sink drama. *Subversive Champagne* centres on eighteen episodes from the monochrome Peel Season 4 - widely acknowledged as the artistic pinnacle of the series. It is in this era - caught between video-tape and colour film - that *The Avengers* was undergoing arguably its most profound stylistic and thematic transitions, from mild eccentricity to something genuinely experimental. The author extends his journey into the exhilarating but 'uneven' colour Season 5, adding chapters on seven more episodes, thus allowing us to explore the entire Emma Peel era. Entertaining froth or groundbreaking art? Rediscover the most iconic show in television history.

In this riveting and revealing book, Steve Levy, gives a gripping account of the real-life liberal bias in the media. Once his county's most popular politician, Steve shares a shocking story about how the media treats a politician who switches parties from Democrat to Republican. Few books have been written about switching political affiliations, its repercussions and its consequences.

Bias in the Media explores how the liberal media tries to shape the outcome of elections by:

1. Omitting information opposing their agenda
2. Printing outright false information
3. Determining who will be quoted in articles
4. Making morality decisions on what is "right" or correct

When Steve Levy was the Democratic county executive of New York's largest suburban county, he believed that complaints of liberal media bias were exaggerated. But after switching parties, running for governor and living in the shoes of a Republican office holder, he came to the conclusion that the bias is not only real, but is actually understated. The change in media coverage Levy experienced firsthand after switching his party from Democrat to Republican was nothing less than startling.

"During his years in Long Island politics and government Steve Levy bravely confronted and exposed the shameless hypocrisy, self-righteousness and left wing bias which pervade Newsday and the New York Times. Now, as an author, he convincingly completes the job. *'Bias In The Media'* is a must read!" ~ Congressman Pete King

"Steve Levy gives you a real perspective of public service from the satisfaction of serving citizens to the incredible tribulations involved in switching parties...his unique perspective is all spelled out in this fascinating read." ~Brian Kilmeade , Fox News

A memoir of formative years spent on a series of communes: A "wonderful account of a frankly ghastly childhood . . . Hilarious and heartbreaking" (Daily Mail). At the age of six, Tim Guest was taken by his mother to a commune modeled on the teachings of the notorious Indian guru Bhagwan Shree Rajneesh. The Bhagwan preached an eclectic doctrine of Eastern mysticism, chaotic therapy, and sexual freedom, and enjoyed inhaling laughing gas, preaching from a dentist's chair, and collecting Rolls Royces. Tim and his mother were given Sanskrit names, dressed entirely in orange, and encouraged to surrender themselves into their new family. While his mother worked tirelessly for the cause, Tim—or Yogesh, as he was now called—lived a life of well-meaning but woefully misguided neglect in various communes in England, Oregon, India, and Germany. In 1985 the movement collapsed amid allegations of mass poisonings, attempted murder, and tax evasion, and Yogesh was once again Tim. In this extraordinary memoir, Tim Guest chronicles the heartbreaking experience of being left alone on earth while his mother hunted heaven. "An intelligent, wry, openhearted memoir of surviving a childhood and a cultural phenomenon that were both extraordinary." —Booklist (starred review)

In late 2006 the everyday life of the quiet rural town of Ipswich was shattered by the discovery of the bodies of five women. The residents of London Road had struggled for years with the soliciting and kerb-crawling that they frequently encountered. As Steve Wright, the occupant of No. 79, was arrested, charged and then convicted of the murders, the immediate community grappled with the media frenzy and what it meant to be at the epicentre of this tragedy. Playwright Alecky Blythe recorded extensive interviews with the people of Ipswich. Composer Adam Cork's score is a response to the melodic and rhythmic speech patterns captured on those recordings. London Road is an experimental and challenging work which reveals the ways in which even the darkest experiences can engender a greater sense of our mutual dependence.

An inside look into why Millennials are rejecting careers in politics, and what this means for the future of America's political system Millennials are often publically criticized for being apathetic about the American political process and their lack of interest in political careers. But what do millennials themselves have to say about the prospect of holding political office? Are they as uninterested in political issues and the future of the American political system as the media suggests? Out of the Running goes directly to the source and draws from extensive research, including over 50 interviews, with graduate students in elite institutions that have historically been a direct link for their graduates into state or federal elected office: Harvard Law, Harvard's Kennedy School of Government, and Boston's Suffolk University Law School. Shauna Shames, herself a young graduate of Harvard University, suggests that millennials are not uninterested; rather, they don't believe that a career in politics is the best way to create change. Millennials view the system as corrupt or inefficient and are particularly skeptical about the fundraising, frenzied media attention, and loss of privacy that have

become staples of the American electoral process. They are clear about their desire to make a difference in the world but feel that the “broken” political system is not the best way to do so—a belief held particularly by millennial women and women of color. The implications of Shames’ argument are crucial for the future of the American political system—how can a system adapt and grow if qualified, intelligent leaders are not involved? An engaging and accessible resource for anyone who follows American politics, *Out of the Running* highlights the urgent need to fix the American political system, as an absence of diverse millennial candidates leaves its future in a truly precarious position.
