Home health care is an important aspect of community health and a growing area of healthcare services. Clinical Case Studies in Home Health Care uses a case-based approach to provide home healthcare professionals, educators, and students with a useful tool for thoughtful, holistic care. The book begins with a thorough and accessible introduction to the principles of home health care, including a discussion of supporting theoretical frameworks and information on managing complexities, transitioning patients to home care, and preparation for the home visit. Subsequent sections are comprised entirely of case studies organized by body system. Though cases are diverse in content, each is presented in a consistent manner, incorporating relevant data about the patient and caregivers and the approach to patient care and promoting a logical approach to patient presentation. Cases also include helpful tips about reimbursement practices, cultural competence, community resources, and rehabilitation needs.

facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)."--Online AHRQ blurb, <http://www.ahrq.gov/qual/nursesfdbk>.

Real Stories of Nursing Research demonstrates how direct care nurses in clinical settings overcome their fear and conduct nursing research studies that impact patient care. Highlighting different types of research in Magnet-designated hospitals located in all types of settings, this reference includes examples of studies that have used a quantitative, qualitative, and mixed-methods design.

Case Studies in Nursing Case Management provides portrayals of health care organizations around the nation that have successfully implemented case management programs. It reports on how case management is being used in inpatient, ambulatory, operating room, intensive care, home health, and subacute settings. Specific populations such as pediatric, maternity, dialysis, geriatric, psychiatric, and AIDS/HIV patients are also addressed. Case managers' roles in managed care and community-based settings as well as in insurance companies are described.

This timely book addresses gaps in the understanding of how health information technology (IT) impacts on clinical workflows and how the effective implementation of these workflows are central to the safe and effective delivery of care to patients. It features clearly structured chapters covering a range of topics, including aspects of clinical workflows

With the growth of information and focus on Healthcare Informatics, there remains an interest in case studies. In the current field of Health Informatics there is no text that uses case studies to explain the difficulties that occur. . Edited by specialists in the field of Health Informatics, the third edition of Transforming Healthcare Through Information: Case Studies builds upon the specific examples of case studies to exemplify the various phases of introducing technological advancements into healthcare institutions. The new edition includes a section on how to implement Link2care, a system that will allow caregivers of ill patients, to seek reliable and informative online information and support. In addition the cases will be framed under new sections with discussion on new topics in the area of healthcare technology such as quality data management and knowledge management. The case studies described in the third edition will benefit not only the practicing professional but also the instructor and student studying in the field of health informatics.

This book seeks to define nursing at a management or administrative level. Using the widely regarded Orem self-care deficit model to provide a nursing focus, the authors explore the nursing needs of populations, the roles and functions of advanced practice nursing administration, and the administrative structures, processes and outcomes that facilitate nursing practice.

providers are controlling costs and resources. This book clearly and concisely provides guidelines for appropriate and careful documentation of care. This new edition includes the latest changes and trends in nursing documentation as they relate to the newly restructured healthcare environment. This publication, initiated by the Korean Society of Medical Informatics (KOSMI) and its Nursing Informatics Specialist Group, and the Special Interest Group in Nursing Informatics of the International Medical Informatics Association (IMIA-NI), is published for nurses and informatics experts working with informatics applications in nursing care, administration, research and education, bringing together the worlds of nursing informatics community. Korea is well known for having the highest level of Information and Communication Technology (ICT) accessibility in the world. Advances in ICT in Korea have lead Korean health care sectors to fully utilize the benefit of ICT for health care. The theme of the book, 'Consumer-Centered Computer-Supported Care for Healthy People', emphasizes the central role of the consumer and the function of information technology in health care. It reflects the major challenge in our time, which is developing and using information technology for the improvement of consumer oriented health care. "I would seriously recommend that this book – in text form – should be available in all nursing libraries as a resource for study and reference in the expanding area of nursing and health care."--Paula M. Procter, Reader in Informatics and Telematics in Nursing, The University of Sheffield, United Kingdom.

In this text, Fiona Timmins integrates the findings of recent nursing research with key aspects of the nurse's role. She provides an evidence-based rationale for the best ways of improving cardiac care (in general and for specific conditions), describes important nursing initiatives to reduce the risk factors and presents a needs-based approach to

patient education. Concerned with the need to bridge the current research-practice gap in coronary care, she knows how nurses can make the best use of available research and describes the advances that are being made in nurse-led services in this area. Contemporary Issues in Coronary Care Nursing offers a non-medical approach to coronary care and is informed throughout by the latest nursing theory and research.

You can be an excellent nurse in the clinical setting and still fail to prove that you are an excellent nurse if your documentation is inadequate. Having worked in a variety of inpatient and outpatient settings, I understand the obstacles nurses face. There's just not time, nor do nurses have the mental energy to meticulously document every little thing on top of the rest of their to-do list. That's part of why I became passionate about documentation education. It doesn't have to be an overwhelming, endless challenge to chart exhaustively in hopes that you enter enough data into the chart to defend yourself one day. Rather, leveraging the most critical data, knowing how to format notes and exactly what to say, and when to spend five minutes dumping information into the chart can be learned skills that make documentation faster, easier, and less stressful, while doing a better job of defending your actions. learning fundamental nursing content. Unlike traditional vignettes, these case studies evolve over time as real-life situations, better enabling students to develop the skills they need to problem solve, actively engage, and use critical thinking techniques in new situations. The unfolding case study method also assists in the development of skills that are important for nursing students about to embark on the NCLEX-RN. The text incorporates all types of NCLEX-style questions into the unfolding case studies to facilitate exam preparation. This method offers a unique study opportunity that integrates all fundamental concepts and skills application with practice and professional role responsibilities. The patient care content areas that are needed for NCLEX-RN success--safe and effective care, health promotion, physiological and psychological integrity--are interwoven into an engaging format. References at the end of each chapter provide guidance for additional study as needed. Electronic and web resources provide quick access to valuable web-delivered information that will be useful in a clinical setting. eBook versions of this text will take the reader directly to the web resource. The Handbook of Evaluation Methods for Health Informatics provides a complete compendium of methods for evaluation of IT-based systems and solutions within healthcare. Emphasis is entirely on assessment of the IT-system within its organizational environment. The author provides a coherent and complete assessment of methods addressing interactions with and effects of technology at the organizational, psychological, and social levels. It offers an explanation of the terminology and theoretical foundations underlying the methodological analysis presented here. The author carefully guides the reader through the process of identifying relevant methods corresponding to specific information needs and conditions for carrying out the evaluation study. The Handbook takes a critical view by focusing on assumptions for application, tacit built-in perspectives of the methods as well as their perils and pitfalls. Collects a number of evaluation methods of medical informatics Addresses metrics and measures Includes an extensive list of annotated references, case studies, and a list of useful Web sites

With a wealth of helpful guidelines and assessment tools, Nursing Pathways for Patient Safety makes it easy to identify the causes of practice breakdowns and to reduce health care errors. It provides expert guidance from the National Council of State Boards of Nursing (NCSBN), plus an overview of the TERCAP® assessment tool. The book systematically examines the causes of practice breakdowns resulting from practice styles, health care environments, teamwork, and structural systems to promote patient safety. An overview of the NCSBN Practice Breakdown Initiative introduces the TERCAP® assessment tool and provides a helpful framework for understanding the scope of problems, along with

NCSBN's approach to addressing them. Coverage of each type of practice breakdown systematically explores errors in areas such as clinical reasoning or judgment, prevention, and intervention. Case Studies provide real-life examples of practice breakdowns and help you learn to identify problems and propose solutions. Chapters on mandatory reporting and implementation of a whole systems approach offer practical information on understanding TERCAP® and implementing a whole systems approach to preventing practice breakdowns. Because communication among health care professionals can mean the difference between patient life and death, clear and effective patient care documentation is as important as the delivery of care itself. The rehabilitation professional faces formidable documentation responsibilities. Patient care documentation created by the rehabilitation professional must be accurate, comprehensive, concise, objective, and timely. In an interdisciplinary health care environment, documentation must also be expeditiously communicated to other professionals on the health care team.

The proceedings of the 10th International Nursing Informatics Congress (NI2009) offers a wide range of scientific knowledge to be disseminated among nurses, administrators, physicians or informaticians irrespective of whether they are clinicians, teachers, researchers or students. The variation of papers follow the advances in health information technology, although certain important topics such as ethics, education, management and clinical practice applications remain. The proceedings follows the ten themes of the conference programme: clinical workflow and human interface; consumer health informatics and personal health records; health information technology; terminology, standards and NMDS's; patient preferences and quality of care; patient safety; evidence based practice and decision support; consumer and professional education; strategies and methods for HIT
