The trading, selling, and buying of personal transport has changed little over the past one hundred years. Whether horse trading in the early twentieth century or car buying today, haggling over prices has been the common practice of buyers and sellers alike. *Horse Trading in the Age of Cars* offers a fascinating study of the process of buying an automobile in a historical and gendered context. Steven M. Gelber convincingly demonstrates that the combative and frequently dishonest culture of the showroom floor is a historical artifact whose origins lie in the history of horse trading. Bartering and bargaining were the norm in this predominantly male transaction, with both buyers and sellers staking their reputations and pride on their ability to negotiate the better deal. Gelber comments on this point-of-sale behavior and what it reveals about American men. Gelber's highly readable and lively prose makes clear how this unique economic ritual survived into the industrial twentieth century, in the process adding a colorful and interesting chapter to the history of the automobile.

Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles,

Vintage U.S.-made cars on the streets of Havana provide a common representation of Cuba. Journalist Richard Schweid, who traveled throughout the island to research the story of motor vehicles in Cuba today and yesterday, gets behind the wheel and behind the stereotype in this colorful chronicle of cars, buses, and trucks. In his captivating, sometimes gritty, voice, Schweid blends previously untapped historical sources with his personal experiences, spinning a car-centered history of life on the island over the past century.

Packard, Studebaker, Edsel, De Soto: cars long extinct in the United States can be seen at work every day on Cuba's streets. Havana and Santiago de Cuba today are home to some 60,000 North American cars, all dating back to at least 1959, the year the Cuban Revolution prevailed. Though hardly a new part has arrived in Cuba since 1960, the cars are still on the road, held together with mechanical ingenuity and willpower. Visiting car mechanics, tracking down records in dusty archives, and

talking with car-crazy Cubans of all types, Schweid juxtaposes historic moments (Fidel Castro riding to the Bay of Pigs in an Oldsmobile) with the quotidian (a weary mother's two-cent bus ride home after a long day) and composes a rich, engaging picture of the Cuban people and their history. The narrative is complemented by fifty-two historic black-and-white photographs and eight color photographs by contemporary Cuban photographer Adalberto Roque.
