

Explorers On The Moon

Here men from the planet earth. First set foot upon the moon - July 1969 A.D. We Came in peace for all mankind. From the plaque on the Eagle, Apollo 11, which landed on the moon on July 20, 1969. Thad Roberts, a fellow in a prestigious NASA programme had an idea - a romantic, albeit crazy, idea. He wanted to give his girlfriend the moon. Literally. Thad convinced his girlfriend and another female accomplice, both NASA interns, to break into an impenetrable laboratory at NASA's headquarters - past security checkpoints, and electronically locked door with cipher security codes and camera-lined hallways - and help him steal the most precious objects in the world: Apollo moon rocks from every moon landing in history. Was Thad Roberts - undeniably gifted, picked for one of the most competitive scientific posts imaginable - really what he seemed? And what does one do with an item so valuable that it's illegal even to own? Based on meticulous research into thousands of pages of court records, FBI transcripts and documents, and scores of interviews with the people involved, Mezrich - with his signature high-velocity swagger - has reconstructed the madcap story of genius, love, and duplicity all centred on a heist that reads like a Hollywood thrill ride.

This official NASA poster is part of the Modern Explorers Collection and says "Gateway, Explore Moon To Mars." This is a great gift for aspiring astronauts, astronomy and space enthusiasts, nerds, science geeks, sci-fi fans, aerospace engineers, astronomers, and teachers. The Artemis mission will return the next man and send the first woman to the moon to stay in 2024. This includes the launch of NASA's Orion spacecraft, the Space Launch System (SLS) rocket, and the Gateway Lunar Outpost. Then on to Mars. Use this notebook as a journal, diary, or logbook. It's excellent for writing, planning, tracking, ideas, notes, lists, passwords, contacts, work, school, hobbies, and traveling. Product details: 6x9 Paperback 100 Pages Blank Lined Journal Paper Matte Cover Celebrate the 50th anniversary of the moon landing on July 20th, 2019 and look forward to the Artemis mission in 2024. "That's one small step for a man, one giant leap for mankind." Click "Space Books by Witty Logic" for more.

A novel about a privately undertaken manned trip to the moon.

In this Hugo Award-winning alternative history classic—the basis for the Amazon Original series—the United States lost World War II and was subsequently divided between the Germans in the East and the Japanese in the West. It's America in 1962. Slavery is legal once again. The few Jews who still survive hide under assumed names. In this world, we meet characters like Frank Frink, a dealer of counterfeit Americana who is himself hiding his Jewish ancestry; Nobusuke Tagomi, the Japanese trade minister in San Francisco, unsure of his standing within the bureaucracy and Japan's with Germany; and Juliana Frink, Frank's ex-wife, who may be more important than she realizes. These seemingly disparate characters gradually realize their connections to each other just as they realize that something is not quite right about their world. And it seems as though the answers might lie with Hawthorne Abendsen, a mysterious and reclusive author, whose best-selling novel describes a world in which the US won the War... The Man in the High Castle is Dick at his best, giving readers a harrowing vision of the world that almost was. "The single most resonant and carefully imagined book of Dick's career." —New York Times The Way of the Explorer traces two remarkable journeys--one through space, and one through the mind. Together they fundamentally alter the way we understand the miracle and mystery of being, and ultimately reveal humankind's role in its own destiny.

The only work to date to collect data gathered during the American and Soviet missions in an accessible and complete reference of current scientific and technical information about the Moon. Part of a series of Tintin adventures, this book contains three separate stories. Tintin is a Belgian amateur detective who gets embroiled in every kind of thriller-adventure, along with his dog Snowy, the two policemen Thomson and Thompson, Captain Haddock and Professor Calculus.

Asterix is celebrating 60 sensational years as an international comics superstar, and in the first collected edition from Papercutz, the stories are newly translated into American English for a new generation of fans! The story of Asterix starts here. These are the first three adventures of Asterix as he defends his tiny village from the overwhelming forces of the Roman Empire. Join the short, spunky, and super-powerful warrior from Gaul and his faithful friends--including the boar-eating delivery man Obelix and the ecologically-minded canine, Dogmatix--as they battle to protect their village against impossible odds. Asterix Omnibus volume one collects "Asterix the Gaul," "Asterix and the Golden Sickle," and "Asterix and the Goths." Three classic adventures in one great volume.

Celebrate Tintin's 90th anniversary and the 50th anniversary of the moon landing in this stellar volume including Destination Moon and Explorers on the Moon. This is the first time these two stories have been collected together in an oversized, luxe hardcover edition that features a stunning new cover and lavish silver spine. Sixteen years before the first man walked on the moon, Tintin arrived at the satellite's secret space station to do some galactic detective work. Destination Moon:Tintin, the world's most famous traveling reporter discovers that Professor Calculus is building a space rocket. Tintin and Captain Haddock are amazed to find that Professor Calculus is planning a top-secret project from the Sprodj Atomic Research Centre in Syldavia. And before our intrepid hero knows it, the next stop on this adventure is...space. Explorers on the Moon:Following on from the events of Destination Moon, Tintin finds himself in a rocket on a collision course with the moon. And with Snowy the dog, Captain Haddock, Professor Calculus and the Thompson twins aboard, things quickly spiral further and further out of control. For thousands of years, the Moon has been the one thing in the night sky that everyone anywhere on our planet recognises. Trace the story of the Moon around the world and through history,

from ancient legends about its creation, to its first sighting through a telescope, right up until the Apollo 11 mission and the first Moon landing in 1969.

Space sparks imagination, but nothing quite captures people's attention better than when we actually reach out and touch another world. Whether it's sending missions to the Moon, transporting rovers to trundle around Mars or landing Philae on a comet, the idea that we can not only picture these worlds from afar, but touch them is wonderfully inspiring, and it is through cutting-edge robotic technology that it is made possible. Here space expert Ezzy Pearson delves into the fascinating robotic history of space exploration, from distant times when stars were an unreachable godly mystery, through the intense Space Race, Moon landings, Mars missions, to the future and just how close we are to setting foot on a new world. As we find ourselves on the cusp of a new and exciting space age, Pearson explores how and why humanity turns its best minds to travelling to the stars, and exactly how far we could go.

This space-soaring adventure lets young children glimpse what it would be like to fly into outer space, walk on the moon, and look back at Earth from a very long way away. Part of the Usborne Reading Programme developed with reading experts at the University of Roehampton, specially written for children just starting to read alone. This ebook includes audio and reading-related puzzles. "Crack reading and make confident and enthusiastic readers with this fantastic reading programme." - Julia Eccleshare

Tintin and his friends are involved in the first manned flight to the moon which proves perilous.

DIV Informative, profusely illustrated guide to locating and identifying craters, rills, seas, mountains, other lunar features. Newly revised and updated with special section of new photos. Over 100 photos and diagrams. /div

Forty years ago, Buzz Aldrin became the second human - minutes after Neil Armstrong - to set foot on a celestial body other than the Earth. The event remains one of mankind's greatest achievements and was witnessed by the largest worldwide television audience in history. In the years since, millions more have had their earth-centric perspective changed forever by gazing at the iconic photograph of Aldrin standing on the surface of the Moon with the blackness of space behind him. He described what he saw as 'magnificent desolation'. The flight of Apollo 11 made Aldrin one of the most famous people on the planet, yet few people know the rest of the story. In *Magnificent Desolation*, Aldrin not only gives us a harrowing first-person account of the lunar landing that came within seconds of failure, as well as the ultimate insider's view of life as one of the superstars of America's space program, he also opens up with remarkable candor about his more personal trials - and eventual triumphs - back on Earth. From the glory of being part of the mission that fulfilled President Kennedy's challenge to reach the Moon before the decade was out, Aldrin returned home to an Air Force career stripped of purpose or direction, other than as a public relations tool that NASA put to relentless use in a seemingly nonstop world tour. The twin demons of depression and alcoholism emerged - the first of which Aldrin confronted early and publicly and the second of which he met with denial until it nearly killed him. As an adventure story, a searing memoir of self-destruction and self-renewal, and as a visionary rallying cry to once again set our course for Mars and beyond, *Magnificent Desolation* is the thoroughly human story of a genuine hero.

Former NASA Astronaut Harrison Schmitt advocates a private, investor-based approach to returning humans to the Moon—to extract Helium 3 for energy production, to use the Moon as a platform for science and manufacturing, and to establish permanent human colonies there in a kind of stepping stone community on the way to deeper space. With governments playing a supporting role—just as they have in the development of modern commercial aeronautics and agricultural production—Schmitt believes that a fundamentally private enterprise is the only type of organization capable of sustaining such an effort and, eventually, even making it pay off.

Join the world's most famous travelling reporter in his exciting adventures as he braves an ancient Incan curse in the two-part story *The Seven Crystal Balls and Prisoners of the Sun*, and investigates espionage in the Middle East in *Land of Black Gold*. *The Seven Crystal Balls* The world's most famous travelling reporter is faced with an ancient Incan curse, which is causing its victims to fall into a life-threatening coma. The tomb of Rascar Capac has been unearthed! But one by one, the finders fall into a terrifying coma. Can this be the curse of the Inca gods? Tintin must somehow fathom out the meaning behind his only clue: the shattered crystal ball lying beside each of the victims . . . *Prisoners of the Sun* When Professor Calculus is kidnapped, Tintin and a desperate Captain Haddock set off to Peru on a rescue mission, braving runaway train carriages, yellow fever and avalanches. Then they must find an ancient Inca tribe if they are to find their great friend. *Land of Black Gold* Boom! Doctored petrol is blowing up vehicles all around the country. Determined to find the culprits, Tintin heads for the Middle East, but he is in for a nasty shock when he encounters a familiar face in the desert. Join the most iconic character in comics as he embarks on an extraordinary adventure spanning historical and political events, and thrilling mysteries. Still selling over 100,000 copies every year in the UK and having been adapted for the silver screen by Steven Spielberg and Peter Jackson in 2011, *The Adventures of Tintin* continue to charm more than 80 years after they first found their way into publication. Since then an estimated 230 million copies have been sold, proving that comic books have the same power to entertain children and adults in the 21st century as they did in the early 20th.

In a book with foldout pages, Monica's father fulfills her request for the moon by taking it down after it is small enough to carry, but it continues to change in size.

Blast off into space with this lunar themed installment of DK Books' new educational fiction series for children. Meet the Secret Explorers--a band of brainiac kids from all over the world.

Everyone in this diverse group of young experts has a specialty, from outer space to dinosaurs, and each story follows a character who gets chosen for a "secret exploration." In this fun, fact-filled children's book, space expert Roshni and geology expert Cheng blast off into outer space on a mission to the moon. There, they must navigate the dangerous terrain to clear up space debris before it can interfere with a lunar mission! Along the way the Secret Explorers pilot a space buggy and collect important rock samples. (STORY DETAILS TBC). With a gripping narrative that keeps kids engaged, *The Secret Explorers and the Moon Mission* book by SJ King is the perfect gift for children who are into all things space. It's written for children aged 7-9 years, with lots of information about astronomy and space, to give them an exciting introduction to lunar exploration. At the end of this fictional book, you'll find "Roshni' Mission Notes" which is a summary of all the scientific facts and discoveries made throughout the story. With fun illustrations, quizzes, and a vocabulary list, the educational value of this book is outstanding and great for a classroom read!

A little mouse who dreams of the moon, travels to the Smithsonian Museum where he learns about the history of mouse aviation and begins preparing for his own journey into outer space.

Explorers on the Moon Adventures of Tintin Paw Prints

Tintin: 23 albums i 8 bind

LONGLISTED FOR THE NATIONAL BOOK AWARD • YALSA EXCELLENCE IN NONFICTION FINALIST • A ROBERT F. SIBERT HONOR BOOK This beautifully illustrated, oversized guide to the people and technology of the moon landing by award-winning author/illustrator John Rocco (illustrator of the Percy Jackson series) is a must-have for space fans, classrooms, and tech geeks. Everyone knows of Neil Armstrong's famous first steps on the moon. But what did it really take to get us there? The Moon landing is one of the most ambitious, thrilling, and dangerous ventures in human history. This exquisitely researched and illustrated book tells the stories of the 400,000 unsung heroes--the engineers, mathematicians, seamstresses, welders, and factory workers--and their innovations and life-changing technological leaps forward that allowed NASA to achieve this unparalleled accomplishment. From the shocking launch of the Russian satellite Sputnik to the triumphant splashdown of Apollo 11, Caldecott Honor winner John Rocco answers every possible question about this world-altering mission. Each challenging step in the space race is revealed, examined, and displayed through stunning diagrams, experiments, moments of crisis, and unforgettable human stories. Explorers of all ages will want to pore over every page in this comprehensive chronicle detailing the grandest human adventure of all time!

A collection of amazing real-life stories about space exploration and adventure. Do you know the true story of ... *The first astronauts to land on the moon and were nearly stranded there for ever, if it hadn't been for a felt tip pen that saved them? *The human computers that launched NASA's first rockets into space? *The astronaut that trained to go to space by living in underground caves and completing underwater missions? Humans have always been fascinated by the universe, but only a few have been daring enough to travel beyond the Earth. From venturing into space for the first time to building the International Space Station in orbit, the history of space exploration is filled with peril, bravery and strokes of genius. In this beautifully illustrated anthology, spaceflight expert, Libby Jackson, reveals the very best true stories of humankind's thrilling journey to the stars. Grab your space suit and jump aboard - it's time for an astronomical adventure!

Tintin, Snowy, and Captain Haddock are mysteriously summoned to the Sprodj Atomic Research Centre in Syldavia where Professor Calculus is preparing for a rocket expedition to the moon Great new adventures with your friends Ella, Evan, baby Ed, Tom, Meg and Mel! Over the Moon is a complete Primary English Language Programme fully aligned with the Primary Language Curriculum and integrating the three strands, Reading, Writing and Oral Language. This reader is accompanied by a 2nd Class Skills Book. 2nd CLASS READER: The Wild Explorers 18 page-turning fiction and non-fiction texts Genres: Explanation, Recount, Report, Procedure and Narrative Features characters from the Over the Moon series, making it a fun and relatable reading experience for 2nd Class pupils EXPLORE MORE: www.gillexplore.ie/overthemoon

Neil Armstrong made a big leap for mankind when he took the first step on the moon in 1969. His interest and success in exploring outer space opened doors for the rest of the world. Beginner readers can reach for the moon in this title!

A group of students goes through the gate to an unknown planet for a two-to-ten-day final exam in Advanced Survival only to realize, after a period of fighting the elements and wildlife, that something has gone wrong with the gate and what was a brief survival exam has become an endless struggle for life. Reprint. 10,000 first printng.
