In this IBM® Redbooks® publication we describe how to build an advanced business application from end to end. We use a fictional scenario to define the application, document the deployment methodology, and confirm the roles needed to support its development and deployment. Through step-by-step instructions you learn how to: - Define the project lifecycle using IBM Solution for Collaborative Lifecycle Management - Build a logical and physical data model in IBM InfoSphere® Data Architect - Confirm business rules and business events using IBM WebSphere® Operational Decision Management - Map a business process and mediation using IBM Business Process Manager - Use IBM Cognos® Business Intelligence to develop business insight In addition, we articulate a testing strategy using IBM Rational® Quality Manager and deployment options using IBM Workload Deployer. Taken together, this book provides comprehensive guidance for building and testing a solution using core IBM Rational, Information Management, WebSphere, Cognos and Business Process Management software. It seeks to demystify the notion that developing and deploying advanced solutions is taxing. This book will appeal to IT architects and specialists who seek straightforward guidance on how to build comprehensive solutions. They will be able to adapt these materials to kick-start their own end-to-end projects.

"The budget and financial reporting processes are well known sources of frustration for most CFOs. Seeking a quick fix to the problem, the common solution is to pour more money into new and better software. This leaves the root cause, the inefficient and dysfunctional underlying processes and routines, unaddressed. As this book shows, substantial and sustainable improvements are only achieved through an holistic approach to process improvement, technology, strategy, and people." —Tom Henry Knudsen, Executive Vice President, Telenor Eiendom Fornebu AS, Proven methods for improving efficiency Corporations face a high turnover among financial managers, rapid changes in technology, lack of time and process redesign skills, and ongoing ambiguity about primary objectives behind the budgeting and financial reporting processes. Amid this frenzy, it is the fundamental efficiency of these processes that dramatically impact overall business performance. Process Improvement for Effective Budgeting and Financial Reporting provides financial managers with a compelling blueprint for increasing efficiency and eliminating waste of time and energy. Four operational experts layout an 80/20 plan—improving 80% of processes in 20% of the time it would take to improve 100%—and explain a Business Process Improvement (BPI) plan that incorporates: The emerging trends affecting financial managers today Step-by-step process implementation Interviews with industry leaders, consultants, and managers who have successfully instituted BPI plans Appraisals of the available software that can help or hinder the process There is no substitute for improved efficiency. CFOs, controllers, budget managers, and financial analysts will significantly benefit from adding this authoritative guide to their professional libraries.

La definizione di un nuovo strumento di Business Reporting, il quale include, oltre alle tradizionali informazioni finanziarie, anche quelle quali-quantitative (non-finanziarie) sulla capacità da parte delle imprese di generare in modo sostenibile il valore e sui rischi correlati, è uno dei temi più attuali e vivaci per chi si occupa di management aziendale e di analisi finanziaria. L'opera si propone di presentare criticamente le proposte delle principali organizzazioni il cui obiettivo è quello di promuovere un nuovo conceptual framework per il Business Reporting, nella forma del Bilancio Integrato, capace di rappresentare, in modo più soddisfacente ed esaustivo, le varie dimensioni economiche e socio-ambientali, inclusa quella "intangibile", dei risultati d'impresa. Per conferire una visione pragmatica ai contenuti dei vari capitoli viene riportata l'esperienza, narrata direttamente dagli autori, di molti "thought leader" che hanno un background sulla creazione del valore e di coloro, le cui organizzazioni di appartenenza possono essere considerate dei pionieri nella predisposizione del Bilancio Integrato.
