Financial Accounting helps students “nail” the accounting cycle up front in order to increase success and retention later on. The concepts and mechanics students learn in the critical ‘accounting cycle’ chapters are used consistently and repetitively—and with clear-cut details and explanations—throughout the remainder of the text, minimizing confusion. A solid enhancement to already solid fundamentals, the eighth edition now features new co-author Bill Thomas of Baylor University who brings his expertise on auditing, ethics, and internal controls to key sections of the book.

Horngren's Accounting presents the core content of the accounting course in a fresh format designed to help today's learner succeed. The often difficult and intimidating topics in introductory accounting courses are reinforced with a wide variety of exercises and problems allowing students to practice similar questions many times until the concepts are clear.

KEY TOPICS: Accounting and the Business Environment; Recording Business Transactions; Measuring Business Income: The

Adjusting Process; Completing the Accounting Cycle; Merchandising Operations; Accounting for Merchandise Inventory; Accounting Information Systems; Internal Control and Cash; Receivables; Property, Plant, and Equipment; and Goodwill and Intangible Assets; Current Liabilities and Payroll MARKET: Appropriate for Principles of Accounting courses.

'Financial Accounting for Decision Makers' presents the key concepts of accounting without going into too much unnecessary technical detail. The book is aimed as 'users' of accounting information, not 'preparers' of accounts.
