

Netobjects Fusion 11 User Guide

SUCCESSFUL WRITING AT WORK, 11th Edition, features an abundance of real-world examples and problems, an accessible writing style, and detailed guidelines for planning, drafting, revising, editing, formatting, and producing professional documents and graphics in the global workplace. Students are presented with topics in four logically sequenced sections, beginning with a discussion of the writing process and collaboration, followed by material on basic business communications (including e-communications and social media), letters, and resumes; conducting research and documenting sources; and more advanced tasks such as preparing visuals, websites, instructions, procedures, proposals, short and long reports, and presentations. With each new writing assignment, students learn to become effective problem solvers, to work effectively as members of a collaborative team, to understand their global audience, and to select the best communication technologies to accomplish their goals. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This volume contains the proceedings of two recent conferences in the field of electronic publishing and digital documents: – DDEP 2000, the 8th International Conference on Digital Documents and Electronic Publishing, the successor conference to the EP conference series; and – PODDP 2000, the 5th International Workshop on the Principles of Digital Document Processing. Both conferences were held at the Technische Universität München, Munich, Germany in September 2000. DDEP 2000 was the eighth in a biennial series of international conferences organized to promote the exchange of novel ideas concerning the computer production, manipulation and dissemination of documents. This conference series has attempted to reflect the evolving nature and usage of documents by treating digital documents and electronic publishing as a broad topic covering many aspects. These aspects have included document models, document representation and document dissemination, dynamic and hyper-documents, document analysis and management, and wide-ranging applications. The papers presented at DDEP 2000 and in this volume reflect this broad view, and cover such diverse topics as hypermedia structure and design, multimedia authoring techniques and systems, document structure inference, typography, document management and adaptation, document collections and Petri nets. All papers were refereed by an international program committee.

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

Presents step-by-step instructions on using Microsoft FrontPage Express to create and publish Web pages without using HTML and provides tips on adding pictures, sound, and animation to Web pages

Each book in the Simple Guide series provides a subject at a basic level. Only key definitions are discussed, and the detail is kept to the average reader's requirements. Background, history and theory are left out, and only useful and popular tasks are discussed.

A comprehensive guide to help you cut through the hype in order to select the best E-Learning tools and vendors for your specific needs. With its ability to both reduce operating costs and train more people, E-Learning is an attractive option for companies that are trying to balance business and educational goals. But in order to implement an E-Learning program, you'll have to wade through hundreds of learning management systems, learning content management systems, authoring schools, and collaboration environments to determine what solution will work best for your situation. In this in-depth book, recognized E-Learning experts William and Katherine Horton survey the entire field of E-Learning tools for you. They provide you with a systematic way to identify, evaluate, and choose products and services based on different E-Learning scenarios. In this no-holds-barred look at E-Learning tools, the authors:

- * Arm you with a complete list of questions to ask vendors before you commit to a product
- * Describe product limitations throughout each chapter and include special Rant sections that you must read
- * Present tips and tricks as well as common mistakes to avoid
- * List potential vendors and contact information by tool category

The companion Web site contains design forms, checklists of features to look for in the various tool categories, spreadsheets, and lists of specific tools and vendors. For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

A comprehensive programmer's guide to developing sophisticated web-enabled applications with Java. IBM has products in more than two-thirds of the existing commercial systems installations in the world. Over the next several years many of these systems will need to be accessible through the Internet, intranets, and extranets. IBM has chosen Java as the strategic technology for making all of their products ready for e-business. This book describes the Java tools available from IBM and explains how to use them to create Java-based applications. Worden details the challenges and techniques used to implement these technologies and shows you how these products can solve real-world application problems. Covering strategic as well as technical issues, Big Blue Java briefly introduces the emergence of Java and e-commerce at "Big Blue," IBM. The author then provides in-depth discussions

on development tools, server products such as WebSphere Advanced and Enterprise, business and object modeling, the SanFrancisco Java framework, and Visual Age for Java as development environments. Also evaluated are the features and functions of the product suite offered by IBM, to help you find the right software for your e-business requirements. Inside you'll find:

- * Details of the IBM Java product development rationale and process
- * Key features of the IBM Java tool suite
- * Explanation of the role of related object tools including Rational Rose
- * Sample application models
- * In-depth description of the SanFrancisco environment

The CD-ROM contains:

- * Sample code from the book
- * Visual Age for Java forms
- * Servlet samples
- * Rational Rose models
- * IBM support material
