In this book, legendary marketing expert Philip Kotler and social marketing innovator Nancy Lee consider poverty from a radically different and powerfully new viewpoint: that of the marketer. Kotler and Lee assess each proposed path to poverty reduction, from traditional large-scale foreign aid to improved education and job training, economic development to microfinance. They offer powerful new insights into why so many anti-poverty programs fail - and propose a new paradigm that can achieve far better results. Kotler and Lee show how to apply advanced marketing strategies and techniques - including segmentation, targeting, and positioning - to systematically put in place the conditions poor people need to escape poverty. Through real case studies, you'll learn how these marketing techniques can help promote health, education, community building, personal motivation, and more. The authors provide the first complete, marketing-informed methodology for addressing specific poverty-related problems - and assessing the results. They also demonstrate how national and local anti-poverty programs can be improved by more effectively linking government, NGOs, and private companies. Over the past 30 years, the authors' social marketing techniques have been successfully applied to health care, environmental protection, family planning, and many other social challenges. Now, Kotler and Lee show how they can be applied to the largest social challenge of all: global poverty.

More than two millennia ago the famous Chinese general Sun Tzu wrote the classic work on military strategy, The Art of War. Now, in a new edition of Sun Tzu and the Art of Business, Mark McNeilly shows how Sun Tzu's strategic principles can be applied to twenty-first century business. Here are two books in one: McNeilly's synthesis of Sun Tzu's ideas into six strategic principles for the business executive, plus the text of Samuel B. Griffith's popular translation of The Art of War. McNeilly explains how to gain market share without inciting competitive retaliation, how to attack competitors' weak points, and how to maximize market information for competitive advantage. He demonstrates the value of speed and preparation in throwing the competition off-balance, employing strategy to beat the competition, and the need for character in leaders. Lastly, McNeilly presents a practical method to put Sun Tzu's principles into practice. By using modern examples throughout the book from Google, Zappos, Amazon, Dyson, Aflac, Singapore Airlines, Best Buy, the NFL, Tata Motors, Starbucks, and many others, he illustrates how, by following the wisdom of history's most respected strategist, executives can avoid the pitfalls of management fads and achieve lasting competitive advantage.

Business to business markets are considerably more challenging than consumer markets and as such demand a more specific skillset from marketers. Buyers, with a responsibility to their company and specialist product knowledge, are more demanding than the average consumer. Given that the products themselves may be highly complex, this often requires a sophisticated buyer to understand them. Increasingly, B2B relationships are conducted within a global context. However all textbooks are region-specific despite this growing move towards global business relationships – except this one. This textbook takes a global viewpoint, with the help of an international author team and cases from across the globe. Other unique features of this insightful study include: placement of B2B in a strategic marketing setting; full discussion of strategy in a global setting including hypercompetition; full chapter on ethics and CSR early in the text; and detailed review of global B2B services marketing, trade shows, and market research. This new edition has been fully revised and updated with a full set of brand new case studies and features expanded sections on digital issues, CRM, and social media as well as personal selling. More selective, shorter, and easier to read than other B2B textbooks, this is ideal for introduction to B2B and shorter courses. Yet, it is comprehensive enough to cover all the aspects of B2B marketing any marketer needs, be they students or practitioners looking to improve their knowledge.
